IDABUS Teams Management
for Identity Manager (FIM/MIM)

Easily invite others to collaborate – with a chat, meetings, calls, and teamwork all in one place, but keep control of who shares the provided data with whom. Restrict and monitor the management of team members and fine-tune the properties of a team. Manage group memberships automatically based on dynamic user groups. Define team templates according to your needs. The IDABUS Teams Management solution complements existing FIM/MIM environments with convenient functions for managing Microsoft Teams.
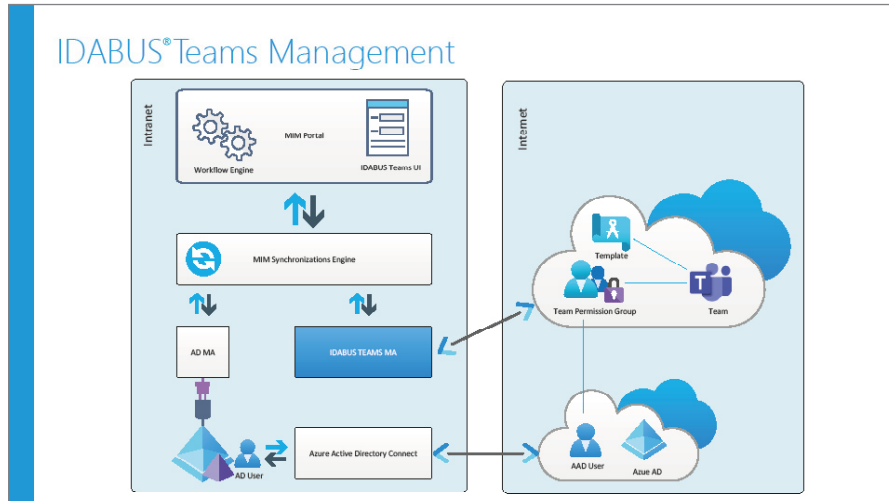

THE FOLLOWING MANUAL AND AUTOMATED IT PROCESSES ARE SUPPORTED

■ Creation, modification, and deletion of teams as well as the administration of memberships
- Manual administration (allocation/withdrawal) of memberships
- Rule-based administration of memberships (dynamic groups)
- Integration of approval processes

■ Administration of team owners
- Manual administration
- Rule-based administration

■ Management of Exchange Online settings
- Primary e-mail address / e-mail aliases
- Distribution of conversations by e-mail to team members

■ Management of team settings
- Team picture
- Privacy settings
- Member permissions
- Guest permissions
- @mentions
- Gimmicks

■ Use of existing teams as a template for the new team to be created
The following properties can be taken from the template:
- Installed apps
- Configured channels
- Configured tabs
- Created folder structures
- Team members
- Team Settings

■ The IDABUS Teams component consists of the following modules
- Member management workflows for the MIM 2016 Portal
- Synchronization rules (inbound/outbound) for the MIM 2016 Portal
- MIM UI extension module for team management
- Team Management Agent for MIM 2016 Sync

The migration of existing Microsoft Teams environments is supported. The transition of the team management can be done gradually or for the entire environment.

■ Requirements
- Existing MIM 2016 environment (Portal and Sync)
- Internet access from MIM 2016 Sync Server
- AAD Connect is configured for the user synchronization AD-AAD

■ Licensing
- once per productive environment (usually once per customer)
- Software maintenance 19% of the list price per year (50% discount with an existing support cotract with IDABUS)
